GLENALDO EZEKIEL HUTAJULU

PRODUCT DESIGNER (UI/UX) AI-powered dashboards · Fintech · Telco

Jakarta, Indonesia (Remote, GMT+7) · glenaldohutajulu@gmail.com
glenhutajulu.netlify.app · linkedin.com/in/glenhutajulu

PROFILE

Product designer with 3+ years in telco, banking and consumer finance. Most recently the sole designer of a large language model (LLM)-powered analytics platform for Telkomsel, taken from concept to release across around 60,000 tower sites. At Aleph, redesigned FIFGROUP's loan journey: in user acceptance testing (UAT), users finished it in under 7 minutes with zero drop-off. Seeking AI and data-heavy product work, remote or in Indonesia.

EXPERIENCE

SENIOR UI/UX DESIGNER
Oct 2025 – Oct 2026

Technova Integrasi Solusi · Jakarta (Remote) · Contract · Enterprise SaaS for Telkomsel's Network team

- **Arsenal:** sole designer, concept to release, of an LLM-powered dashboard forecasting electricity use and billing for around 60,000 BTS tower sites, used by Telkomsel's HQ team (10+) and teams in 12 regions.
- Designed the AI layer: natural-language query, AI-generated summaries and anomaly explanations, so users can query and interpret site-level data in plain language.
- Turned a highly complex forecasting and billing data process into easy-to-read visuals, including interactive KPI cards that double as filters to surface anomalies in one click.
- Designed compliance views that flag license adherence per site and surface upcoming bill due dates, aimed at cutting avoidable utility costs and late payments.
- Partnered with engineering, 2 data scientists, QA and a PM; the HQ team confirmed the design worked before release.

FREELANCE UI/UX & WEB DESIGNER
May 2024 – Present

Independent (Upwork) · Remote · Clients in Indonesia and the US

- Designed and built 2 client websites end to end in Framer: a branded site for Shilohcore Mechanical Design Studio (US) and a corporate site for Bintang Manunggal Pratama Group (Indonesia).

UI/UX DESIGNER
Jun 2023 – Dec 2024

Aleph Indonesia · Jakarta · Singapore-HQ creative technology agency for enterprise clients

- **FIFGO:** revamped the app's long, complex loan journey (application, payment, renewal, late fees, contract management); in UAT, users finished the loan flow in under 7 minutes with zero drop-off.
- **Permata e-Business:** designed local and foreign-currency transfer, bill-payment and bulk-upload flows.
- **Telkomsel Orbit:** simplified navigation through heuristic evaluation and user testing, and redesigned the login, purchase and modem-pairing flows.

UX RESEARCHER & DESIGNER (INTERN)
Dec 2022 – Feb 2023

By.U by Telkomsel · Jakarta

- Ran usability tests and interviews with 5 users, then prioritized fixes such as cutting complaint questions from 10 to 7 and showing upfront the default fix that resolves 95% of weak-signal complaints.

SKILLS

Product design: AI/LLM UX (natural-language query, AI summaries, anomaly explanations), data-heavy dashboards, data visualization, information architecture, interaction design, prototyping, design systems

Research: user interviews, usability testing, heuristic evaluation, journey mapping, user stories

Tools: Figma, FigJam, Framer, Miro, Adobe Illustrator, Photoshop

AI in workflow: Claude for documentation, ideation, and building my coded portfolio site

Languages: Indonesian (native), English (professional)

EDUCATION

PROFESSIONAL CERTIFICATE, UI/UX DESIGN
Nov 2022

Purwadhika Startup & Coding School

BACHELOR'S DEGREE, ECONOMICS
Jan 2020

Bina Nusantara University · GPA 3.72/4.00
